Single Flow POC - AI Dev Agent Flow

On-Prem Company Boundary

Note:
The "Manager Agent" will look in the "Available Agent List" repo and search the agent index to find the full agent persona, skill and tools that will be able to pull the markdown files and create the appropriate agent.f So the agent will pass the repo location, and repo folder that contains all the markdowns, as well as the Behavioral Specification.

Hermes Agent
(Ephemeral Docker Container)

Claude Code Agent (N+1)
(Ephemeral Docker Container)

Note:
On load up, the ephemeral agents will pull the full agent profile markdowns from the repository, load those profiles, receive the behavioral specifications, then run the required tasks and then destroy the agent and container.
